

Keathley Landscaping Expands NDS Certified Yard Drainage Company Services Across North Texas

September 03, 2026

GARLAND, TX - September 03, 2026 -

Keathley Landscaping, a Fate, Texas-based drainage contractor, has expanded its specialized yard drainage services to address the growing number of homeowners facing lawn flooding and water damage across the region. The company, led by NDS Certified Drainage Contractor Logan Keathley, focuses on resolving complex drainage problems that threaten residential properties.

Poor yard drainage remains a costly concern for homeowners, particularly because flooding and related property damage are typically not covered by homeowners insurance. Standing water, saturated soil and improper grading can undermine foundations, ruin landscaping and create ongoing structural issues. In response to these conditions, Keathley Landscaping provides engineered solutions ranging from French drains and grading to large, custom-designed buried drainage pipelines.

The company holds certification from NDS, a recognized standard within the drainage industry, and applies that training to diagnose and correct drainage issues that other contractors often overlook. Each project

begins with a detailed assessment of the property to identify the source of water problems before a tailored solution is developed.

As a yard drainage rowlett provider, the company serves homeowners throughout the eastern Dallas metropolitan area, where clay-heavy soils and seasonal rainfall frequently combine to create standing water and erosion.

"Every yard tells a different story, and the source of a drainage problem is rarely obvious at first glance," said Logan Keathley, founder of Keathley Landscaping. "The work begins with understanding how water moves across a property. Once that is clear, the right combination of grading, French drains and buried pipelines can put an end to flooding for good." The company applies the same approach for drainage rockwall projects, adapting each plan to the specific grade, soil type and layout of the property.

Logan Keathley noted that many homeowners attempt temporary fixes before seeking professional help. "A surface trench or a bag of soil may hide the symptoms for a season, but the water returns," he said. "A properly engineered system addresses the underlying cause. That is the difference between a patch and a permanent solution."

Beyond drainage work, Keathley Landscaping offers a full range of outdoor services, including sod installation, landscape lighting, stonework and retaining walls, flowerbeds and hardscapes, landscape design and installation, fence repair and installation, patio covers, outdoor kitchens, firepits, and tree trimming and large tree removal. These services allow the company to restore both the function and appearance of a property after drainage corrections are completed.

As a drainage company fate residents have relied on, Keathley Landscaping continues to focus on practical, durable results at reasonable cost. The company's expansion reflects rising demand across communities including Rockwall, Rowlett, Garland, Wylie, McKinney, Frisco, Plano and Allen.

Keathley Landscaping is a full-service landscaping and drainage company based in Fate, Texas, serving the greater Dallas metropolitan area. Founded by NDS Certified Drainage Contractor Logan Keathley, the company specializes in solving complex yard drainage and flooding problems while offering a complete range of landscape design, hardscape and outdoor living services. The company has built its reputation on technical expertise, practical solutions and a customer-focused approach to residential property improvement.
